

## Crosswalk

Systematic Problem Solving	----- <i>Connections</i> -----	Plan-Do-Check-Act ~PDCA~	Team Initiated Problem Solving ~TIPS~
<b>Problem Identification</b>	<i>The function of this step is to identify the problem and goal.</i>		Identify Problem with Precision
<b>Problem Analysis</b>	<i>This step is designed to identify the reason why there is a discrepancy between current and expected performance.</i>	Plan	Identify Goal for Change
<b>Plan Implementation</b>	<i>Based on the information gained an intervention plan is created with detailed directions as to what, and when specific instruction/intervention activities will occur with fidelity, including the identification of personnel to implement the instruction/intervention and support structured for them.</i>	Do	Identify Solution and Create Implementation Plan with Contextual Fit  Implement Solution with High Integrity
<b>Plan Evaluation</b>	<i>Plans for gathering the necessary to determine the effectiveness of the instruction/intervention are made. Data is collected and evaluated to determine the effectiveness of the plan and next steps.</i>	Check	Make Summative Evaluation Decision
		Act	
<i>The Collection and Use of Data is Done at All Steps</i>
